

AQUILA INITIATIVE

BRIDGING THE GAP

Partnering with healthy churches to produce competent leaders for church planting in Europe.

THE URGENCY FOR COMPETENT LEADERS IN EUROPE

There is a disparity of competent leaders in Europe, who accurately teach and apply the Word of God. By partnering with Aquila Initiative, churches can send their potential leaders to the Aquila Theological Institute to be thoroughly equipped, to be sent out with the logistical support of Aquila Initiative, to plant new churches.

Aquila Theological Institute offers a competency based theological apprenticeship in a local church and Business in Mission, giving church planters relevant training and in-the-field ministry experience. We support churches by equipping people with the theological and business skills necessary to engage in marketplace missions in order to plant new gospel-centered churches.

Business in Mission is a multiplication of small businesses as a means of market-place ministry which offers Christ-exalting community to the world. Business in Missions serves to financially support church planters, establish them in a community in order to build relationships, share the Gospel and plant churches.
